

Database System (2017-2)

Assignment –3

Note: *Deadline for submission (2017-10-29)*

Task-1: Consider your database and write store procedures for each table for:

1. insert record
2. delete record.
3. Update record

Your stored procedures should also do the followings

- a. Validate input parameters
- b. Check the key attribute for its appropriateness
- c. Check the foreign key constraint
- d. Code (you can write a separate function or procedure) for derived attributes
